

## Press information YUHA® GmbH

YUHA® GmbH specialises in the conceptual design and construction of logistics facilities. We can develop the perfect logistics solution, even for complex challenges. Each individual team member works with the YUHA® philosophy in mind: "Vision. Expertise. Quality."

In close collaboration with our customers, we analyse the specific requirements at hand, keeping the internal structures and company-specific business processes in mind. Based on this analysis, YUHA® experts develop corresponding logistics facilities that are not just structures, but functional and inter-coordinated "logistics tools". In this process, we help our clients to carry out logistics processes with absolute efficiency. In so doing, we always provide maximum forward-looking flexibility.

Ever since YUHA® GmbH was founded in 2001 by Yuha Takayanagi, clients have placed their trust in us – due to our outstanding quality, reliable adherence to delivery schedules and dependable cost security. Over the course of the years, we have completed eight large-scale projects that provide a total effective area of 250,000 m<sup>2</sup> - for very prominent clients such as Kühne + Nagel, H&M and Continental. In 2008, YUHA® GmbH was responsible for a construction volume of over 150 million euros.

Yuha Takayanagi began his career with the study of civil engineering in Karlsruhe and Aachen. While working for the WM Group in Bocholt, he quickly recognised the special challenges that logistics companies face. He decided to specialise in the planning and construction of unique logistics facilities, which ultimately led to the founding of YUHA® GmbH as the logical consequence of these professional activities. In 2002, his university friend Klaus Meeß, whose specific expertise ideally complemented that of Yuha Takayanagi, joined the company.

On 12 May 2007, Yuha Takayanagi was killed in an accident. Since then, Managing Partner Klaus Meeß has directed YUHA® GmbH based on the jointly developed philosophy and values "Vision. Expertise. Quality."
